VETRA AI PLATFORM

INTELLIGENT OPERATIONS CONNECTED TEAMS

A desktop portal for projects, evidence, teams and market intelligence with connected mobile and tablet web views

OIL AND GAS

MARITIME

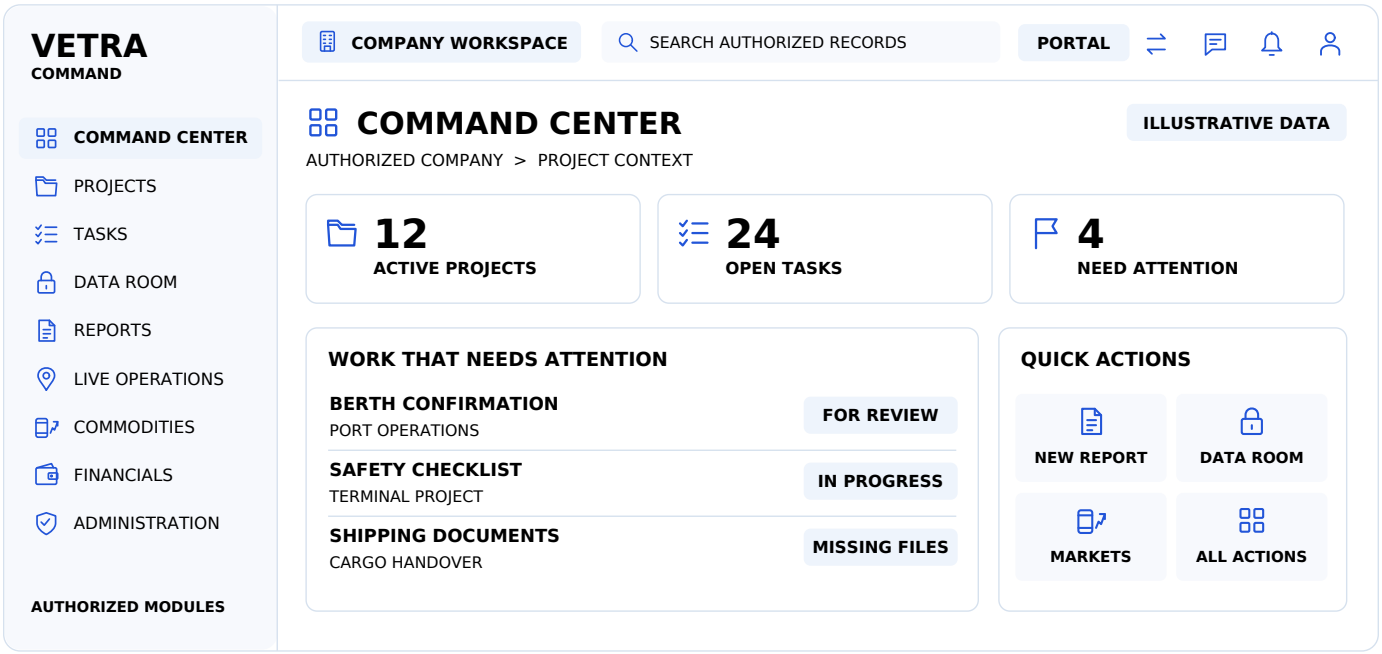

LOGISTICS

PORT OPERATIONS

THE DESKTOP PORTAL AND CONNECTED WEB VIEWS

ONE PLATFORM THREE VIEWS

A dedicated desktop portal and distinct mobile and tablet layouts share one web platform one identity and one set of permissions

ILLUSTRATIVE PORTAL DESIGN

PORTAL

Sidebar tables and detailed review

MOBILE

Phone navigation and field capture

TABLET

Touch controls and split workspaces

ONE INVITATION ONE IDENTITY

Save the role and permissions first then send one company-branded SES invitation with one link for every device

YOUR AUTHORIZED WORKSPACE

Keep company context, projects, profile, sessions and supported web notifications connected to the current account

CHOOSE AND SWITCH YOUR VIEW

Choose Portal, Mobile or Tablet after every login and switch during the same session without signing in again
The layout changes while permissions and account rules stay the same

CORE PLATFORM CAPABILITIES

OPERATIONS UNDER CONTROL

Keep responsibility, operational evidence and commercial context connected from assignment to approved completion

PROJECTS AND TASKS

Workstreams, RACI roles, bulk requests, timelines, milestones, dependencies and reviewed progress with safe concurrent updates

DUE DILIGENCE

Track missing evidence, filings, renewals, reusable templates, independent approvals and recorded external confirmations

FIELD CAPTURE

Capture and review photos, video, voice and files with optional location, upload progress and protected playback

SECURE DATA ROOM

PDF, Word, Excel, PowerPoint and images with folders, search, previews and retained versions

CONTROLLED SHARING

Apply classification and recipient eligibility with separate rights to receive, download, export and share

MESSAGES AND REPORTS

Durable conversations and daily, incident, inspection, delivery and progress reports with recurring schedules and delivery history

FINANCIAL OVERSIGHT

Budgets, fiscal periods, spend, commitments, reserves and sourced FX with independent approvals and controlled exports

ASSETS AND ZONES

Vessels, voyages, port calls, trucks, shipments and checkpoints with authorized position history, geofences and boundary alerts

INTEGRATION REQUIRED

Licensed asset feeds and connected delivery services require verified integration and owner acceptance

FOURTEEN CONNECTED CAPABILITIES

AI INTELLIGENCE

Turn authorized evidence into useful drafts, answers and operational insight while keeping decisions with people

AI VOICE TRANSCRIPTION
Turn Arabic and English voice notes into text

AI MESSAGE TRANSLATION
Translate messages while retaining the original

AI VOICE READBACK
Read permitted tasks, alerts and reports aloud

AI REPORT GENERATION
Draft reports from evidence and task updates

AI MANAGEMENT BRIEFINGS
Summarize progress, open issues and priorities

AI DATA ROOM ASSISTANT
Answer document questions with source citations

AI SEMANTIC SEARCH
Find records and transcripts by their meaning

AI OPERATIONS ASSISTANT
Ask operational questions within current access

AI SHIPPING DOCUMENT READER
Extract shipping document fields for review

AI CUSTOMS CHECKLIST
Identify missing files and inconsistent details

AI FINANCIAL REVIEW
Flag unusual amounts and possible duplicates

AI PHOTO INSPECTION
Draft cargo and site observations for verification

AI ZONE SUMMARIES
Explain authorized entry and exit events

AI ARRIVAL PREDICTIONS
Estimate arrivals from approved history

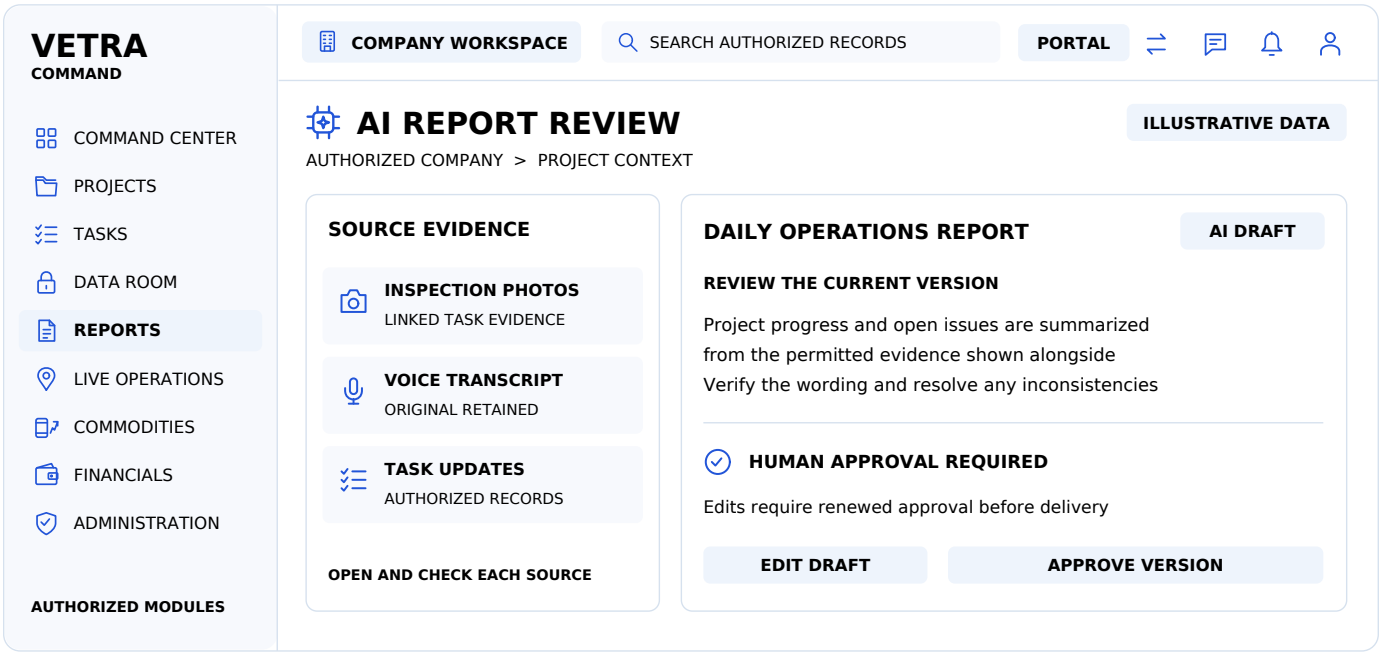

OWNER CONTROL AND HUMAN REVIEW

AI activation requires approved services and owner acceptance with company switches and spending limits
Outputs remain drafts or flags and arrival predictions require a separate owner decision

SOURCE EVIDENCE AND DESKTOP REVIEW

AI IN YOUR WORKFLOW

Review AI drafts beside the supporting evidence in the portal and keep every action within existing permissions

ILLUSTRATIVE PORTAL DESIGN

EVIDENCE INTO INSIGHT

Link photos, transcripts, tasks and documents to draft reports, inspection notes and summaries

ANSWERS WITH SOURCES

Ask across permitted records and open the cited document or passage to verify the answer

REVIEW BEFORE ACTION

Verify extracted fields, finance flags and wording before export, sharing or a record change

OWNER CONTROL

Company switches, user permissions and spending limits govern AI while ordinary work continues

APPROVE THE EXACT VERSION

Edited or regenerated content needs renewed approval before export or external delivery
Scheduled AI work prepares private drafts for an authorized person to review

MARKETS IN THE OPERATIONAL WORKSPACE

COMMODITY INTELLIGENCE

Connect licensed market evidence with watchlists, operational reporting and separately authorized financial context

ENERGY AND MARKETS

WTI, Brent, Dubai or Oman and gas benchmarks with approved LNG, LPG, refined products, bunkers, metals, coal, agriculture and freight indices

PRICES AND CHARTS

Review contract, source, time, currency and unit with historical charts, comparisons and clear live, delayed, stale or unavailable states

WATCHLISTS AND ALERTS

Sync personal and permitted team lists, home favorites and threshold or change alerts with freshness checks

SNAPSHOTS AND EXPORTS

Share permitted market snapshots with quote context, timestamps, comparison baselines and calculation assumptions

AI MARKET INSIGHT

Request summaries, watchlist answers and licensed news context with separately enabled anomalies and forecast bands

PROJECT COST SCENARIOS

Combine deterministic market calculations with approved project and financial records under separate access rights

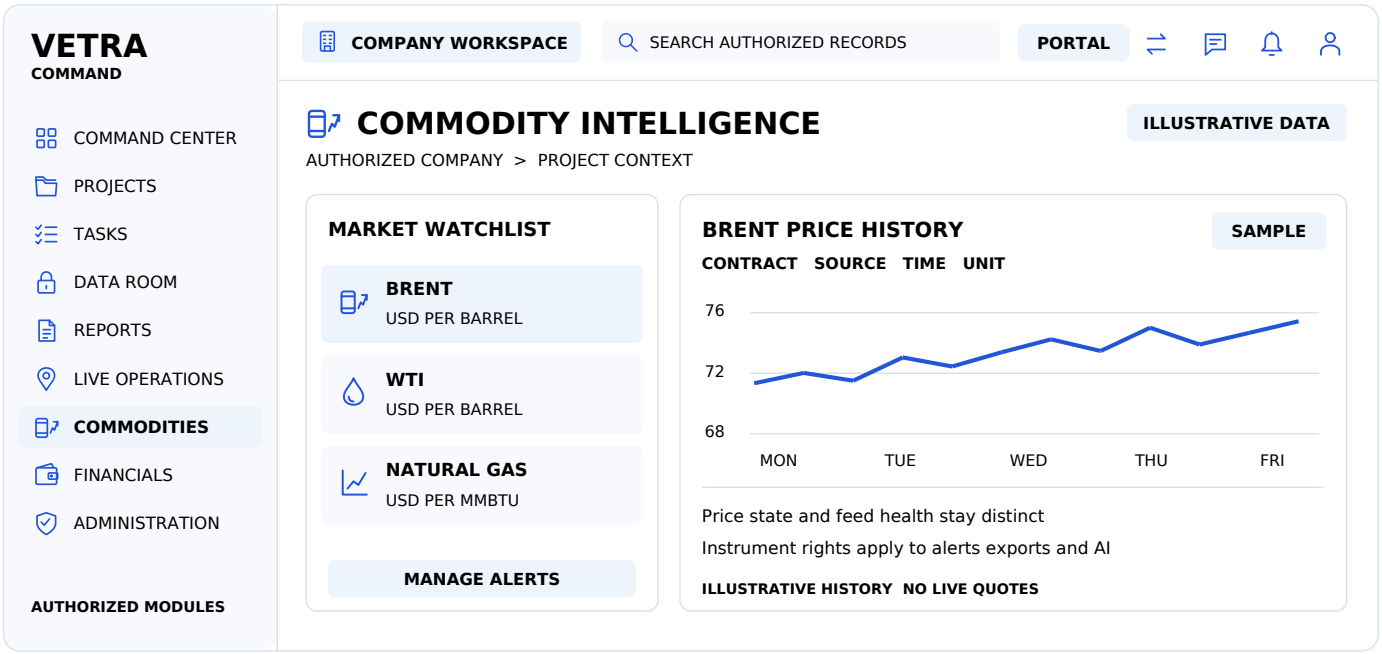

INTEGRATION REQUIRED

Licensed feeds and instrument rights govern display, history, alerts, export and AI use
Published assessments retain their actual cadence and forecasts remain distinct from observed prices

PORTAL MARKET INTELLIGENCE

MARKETS IN YOUR WORKFLOW

Review market context charts watchlists and alert rules in a wide portal workspace connected to the same authorized records

ILLUSTRATIVE PORTAL DESIGN

MARKET FAVORITES

Synchronize personal and approved project watchlists with favorites in the command center

ALERT CONTROL

Set thresholds, direction, percentage periods, resets and cooldowns using fresh observations

COMPARISONS AND COSTS

Align contracts, units, currencies and time before market comparisons or authorized cost scenarios

MARKET REPORTS

Share snapshots with source time, units, provenance and calculations through existing access controls

KEEP THE PRICE CONTEXT VISIBLE

Show benchmark, contract, source time, currency and unit with distinct data and feed states
Licensed evidence supports AI summaries and clearly labeled anomaly or forecast outputs

VETRA

ENERGY · MARITIME · LOGISTICS

CONNECTED TEAMS GOVERNED INTELLIGENCE

One secure operating environment for people, projects and AI

OWNER SUPER ADMIN

The sole platform-wide authority controls access, roles, feature activation and protected removal approval

SCOPED PERMISSIONS

Company, project and technical roles stay within approved scope with separate action rights and controlled integrations

ONE SHARED FOUNDATION

One web application and one AWS deployment share Cognito identity, one API and one data model across every view

EVERY CAPABILITY PRESERVED

Preserve every existing capability and record with protected files, current permissions, audit history and recovery

OIL AND GAS | **MARITIME** | **LOGISTICS** | **PORT OPERATIONS**

TEST BEFORE RELEASE

Verify existing and new workflows permissions navigation synchronization AI security and recovery
